SWISS AVIATOR FLIES OVER ALPS MOUNTAINS SEAL APARTMENTS

BERNE, Switzerland, Dec. 25.—Oscar Bider, a Swiss avintor made a successful flight across the Alps today, though for several hours he was unable to see his way because of the heavy fog which hung over the mountain. The airman arrived here at 2:10 o'clock this afternoon after a journey from Buc, from which place he started at 9 a.m. Bider said that after leaving the French nerodrome he was forced to maintain an altitude of 6500 feet almost constantly in order to avoid the fog. He passed over the Jura, the chain of mountains separating France from Switzerland, without being able to see any landmarks, but recovered his bearings on sighting the Jungfrau, one of the most famous mountains of the Swiss Alps, about half an hour before he came to Berne.

Cardinal Rampolia's last will and testament.

That a will was executed by Cardinal Rampolia bearing a later date than the will found is considered almost certain because the cardinal left a key with a tag attached, on which was inscribed in his own handwriting the statement that the key opened a box containing his will and those close to the cardinal think it incredible tain he would not alter his testament of 1889, explaining that his estate had grown four-fold since that date. date.
The box referred to has not been found. The box referred to has not been found and so far no one has come forward to say that he has absolute knowledge of the existence of the testament reported to be missing. There is no evidence that it was stolen, and no claims have been set up by anyone that he has sustained damage by the loss of the will. The authorities therefore are not in a position to take action, because, according to the Italian law in such cases, prosecution could be possible only after some interested persons had prosecuted charges. As the situation is now the authorities could not even start an investigation.
